

Family and Community Services

When children receive the best care and education early on, they'll be successful throughout their lives.

WE'RE HERE TO HELP!

Let 4C for Children help you find the resources and tools you need to give your child a solid academic and social emotional foundation. You can rely on our specialists to help you find child care, connect with local and state resources to benefit your child or walk with you as you consider fostering or adopting a child.

WHAT WE OFFER

Child Care Referral Service

Contact us about your child care needs and receive FREE support in finding a licensed child care provider. You'll receive a list of referrals to child care programs with confirmed openings that best meet your needs.

Families facing barriers to accessing and affording child care – stable housing, language, non-traditional work hours, transportation or health and/or developmental needs – may receive additional support in applying for financial assistance and in interviewing child care programs.

Connection to Local and State Support

4C for Children's Parent & Youth Ambassadors are skilled in helping families navigate social systems to access local and state social service resources and support for children ages birth to 21. Specialists will walk with you and help you obtain the services you need.

Foster/Adoptive/Kinship Care

4C for Children serves families in Southwest Ohio and the Miami Valley who are interested in opening their homes to children in foster care. We can help you navigate the initial steps to becoming a foster parent and connect you with a local foster care agency.

In addition, we provide ongoing support to all foster families, adoptive and kinship care families through education and networking opportunities.

Family Resources

4C for Children offers a variety of early childhood resources to families such as the monthly e-newsletter *Family Source*, Vroom tips and ongoing opportunities to strengthen parenting skills. All resources can be found on our website.

Learn More
